

**Level 1**—The easiest of rides and appropriate for first time riders and those not completely confident in their abilities on the Segway. This ride includes nearly all asphalt surfaces with minimum transitions. Examples: rides in the Villages and Clearwater.

**Level 2**—Appropriate for newer riders who are comfortable on the machine and confident on both asphalt and solid off-road surfaces, including transitions from sidewalk to roadway, over speed bumps that cannot be avoided, or over occasional roots, bumpy weeded paths and some medium to soft sand. Examples: Paynes Prairie State Park, Silver Springs State Park and Leesburg.

**Level 3**—The most demanding ride and requiring the most experience, confidence, skill and physical endurance. These outings are off-road in areas that may involve water across a trail, soft sand (aka sugar sand), extended bumpy paths and/or significant roots. The ride may demand cautious on-machine progress or walking the machine through areas where the machine cannot be ridden. Examples: Wekiwa State Park and Lake Louisa State Park.
